NAME
CURLINFO_HTTP_CONNECTCODE – get the CONNECT response code

SYNOPSIS
#include <curl/curl.h>

CURLcode curl_easy_getinfo(CURL *handle, CURLINFO_HTTP_CONNECTCODE, long *p);

DESCRIPTION
Pass a pointer to a long to receive the last received HTTP proxy response code to a CONNECT request. The returned value will be zero if no such response code was available.

PROTOCOLS
HTTP

EXAMPLE
TODO

AVAILABILITY
Added in 7.10.7

RETURN VALUE
Returns CURLE_OK if the option is supported, and CURLE_UNKNOWN_OPTION if not.
